LONDON FORTUNE TELLERS IN JAIL

Society Women Much Engrossed
in Hearing Evidence Against
Men Who Duped Them.

MANY LETTERS DISCOVERED.

Numerous Ways of Luring Cash
From Plethoric Purses Dis-
closed by Testimony of
Clever Detectives.

SPECIAL BY CABLE TO THE ST. LOUIS REPUBLIC AND THE NEW YORK HERALD, London, Sept. 10.—(Copyright, 1904.)—Society women have been greatly interested in the hearing of the charges against the heads of two West End fortune-telling establishments, whose dupes have been, which was concluded this week.

Such thriving business have "Keiro" and "Madame Keiro" and "Yoga" been doing among well-known women that the matter was brought to the notice of the police, who arrested the "seers" and charged them with "witchcraft, and obtaining money under false pretenses," for which offenses they now stand committed for trial.

A great deal of the evidence given

against the prisoners at the police court was of a very amusing character. Mrs. Keiro, a young detective, described her visits to "Yoga" and the "Keiros". "Yoga" told her she would live to be 100, but then she had paid the latter a higher fee. Mrs. Keiro also learned that her husband was to make a lot of money on the Stock Exchange, and that he was very fond of her child, when he said or did anything clever. Whose explanation to the court that she had no child. Her father was described by "Yoga" as being a man with a white beard, who was very active and clever, but who would not live many more years. The witness's father had already been dead five years when she was told this.

Miss Dorothy Tempest, another detective, told the court that "Keiro" had given her until 10 to live, as against "Yoga's" 60. She also stated that the additional ten years had been allotted for a higher fee.

A Mr. Richards was told by "Yoga" upon the occasion of his visit, that if he already married he would get married and have two children.

Among the documents discovered at the prisoners' rooms, said Chief Inspector Brown, were post cards containing terms for palmistry, horoscopes, and clairvoyance crystals. Numerous letters from women were also discovered, asking questions about the future. From invoices found it appeared that the glass balls were purchased by the prisoners at a shilling each, and sold for as much as 15s.

DISCUSS RELATIVE VALUES OF SIZES IN SUBMARINES.

SPECIAL BY CABLE TO THE ST. LOUIS REPUBLIC AND THE NEW YORK HERALD, London, Sept. 10.—(Copyright, 1904.)—Naval authorities are now discussing the relative values of large and small submarines. Some would build one-man submarines that can be carried in davits; others would build submarines of considerable tonnage. It has been found that the larger the vessel the quicker it can be submerged. The new "A" class in the British navy takes but six minutes for a dive.

The Pall Mall Gazette reports an epidemic of Malaria fever in the Mediterranean squadron due to the bad ventilation of most of the British ships.

ENGLISH MILLERS FIGHT AMERICANS

Will Try to Regain Flour Trade,
Which Has Been Almost
Completely Lost.

BAKERS DEEPLY CONCERNED.

Efforts Are Under Way to Over-
come the General Prejudice
Against Products of the
British Grinders.

SPECIAL BY CABLE TO THE ST. LOUIS REPUBLIC AND THE NEW YORK HERALD, London, Sept. 10.—(Copyright, 1904.)—English vs. America is the heated subject to debate at the exhibition held by the bakers and confectioners at Agricultural Hall this week.

Much interest to the trade in America is to be found in the promise, which states at the exhibition give of a great revival of the flour milling in this country.

As in many other departments the lack of home initiative in the past has resulted in our American cousins buying his flour on quite three-fourths of the English flour trade in London. Indeed, the American trader has had practically his own way, and many persons, even the bakers themselves, had almost come to regard the British grinding and blending as on the point of extinction.

The exhibitors, however, who strongly represent the industry in England, seem very determined to make an effort to turn the tables on American competitors. Two of the largest flour millers in the country, Mr. Vernon of Liverpool and Mr. H. H. Hill, who are the leading spirits in the enterprise, have completed plans for grinding mills at Victoria docks, London. Next year will see their completion. Mr. Vernon is putting up a place, which will be eight floors high and cover three acres of ground. It will have a capacity of 50,000 sacks of flour a week.

Meanwhile the British millers, through the medium of this exhibition, are striving to turn their own millers into consumers against English milled flour. One of the objections has been that British flour was not of sufficient strength; another was that it was impossible to get first-class results when baking bread in large batches.

One of the exhibits now being prepared in which visitors will be interested is a huge batch of 30 loaves baked in one oven. The wheat is to be blended and ground in the new mills, and, of course, be British grown. The owners of the mills intend to make the world over and they will choose the grain from whatever parts of the globe produces the finest.

RICHARD CROKER BUYS RESIDENCE IN IRELAND.

SPECIAL BY CABLE TO THE ST. LOUIS REPUBLIC AND THE NEW YORK HERALD, London, Sept. 10.—(Copyright, 1904.)—Mr. Richard Croker has bought Glencaine, St. John's, County Dublin, formerly the residence of Judge Murphy. The house is to be greatly enlarged. Marble staircase, magnificent suites, reception rooms and a ballroom all are to be added. The work is to be entrusted to Mr. Fuller of Dublin, the architect who carried out the alterations at Kilmore Castle. It will take a year to complete the alterations proposed.

PALAIS DES SOUVERAINS IS OFFERED FOR SALE.

SPECIAL BY CABLE TO THE ST. LOUIS REPUBLIC AND THE NEW YORK HERALD, Paris, Sept. 10.—(Copyright, 1904.)—The Palais des Souverains, in the avenue du Bois de Boulogne, under whose roof were sheltered some of the royal visitors to Paris in 1870, was this week put up for sale. The architect who carried out the alterations at Kilmore Castle. It will take a year to complete the alterations proposed.

HAS DEFINITE PLAN FOR SEPARATION

Premier Combes Announces He
Will Propose It After Other
Issues Are Settled.

RUNS RISK IN DECLARATION.

Opponents of His Favorite Meas-
ures May Coalesce and May
Even Force Reorganization
of the Cabinet.

BY J. CORNELLY.

SPECIAL BY CABLE TO THE ST. LOUIS REPUBLIC AND THE NEW YORK HERALD, Paris, Sept. 10.—(Copyright, 1904.)—The great question of the day, the separation of church and state, and the consequences of such a separation, has progressed in the last week by a step which is perhaps a decisive one.

At Amiens on Sunday the President of the Council, who acted as chairman at a banquet of a political nature of 2,000 covers, devoted the greater part of his speech of an hour and half to this question, the first quarter being consecrated to a polemic, his answer to the enemies of the cabinet, and to some comment upon the success of the Government in the department and municipal elections.

M. Combes declared that, as between the papacy and the Republic there was no incompatibility in principle, proceeding to announce that toward the middle of the coming year he should present in Parliament a proposal for the separation of church and state, after the vote upon the law on the revenue and that upon the workingmen's orange pension.

These three proposals constitute a legislative programme sufficient in scope for any one ministry. Its most predominant feature is the fact that the advancement of the question of separation will certainly coincide with those of the other two elements of the scheme, forming a program strong enough to compass the fall of the Republic, and thus the separation of church and state, and the workingmen's orange pension in place of one.

POPE SEEMS WILLING.

But incidents, meanwhile, have occurred at Rome which seem to indicate that the Pope himself desires that the end should come soon.

The world has not forgotten that the Bishop of Laval and the Bishop of Lyons were summoned to present themselves at the Vatican before the Tribunal of the Holy Office, and that after refusing to obey the command of the head of the church, one after the other they did, in fact, resign their sees.

The Bishop of Laval, who was accused of immoral conduct, resting upon the refusal of the Pope to accept his resignation, was summoned to the Vatican to be judged by the Pope. The Bishop of Lyons, who was accused of immoral conduct, resting upon the refusal of the Pope to accept his resignation, was summoned to the Vatican to be judged by the Pope.

As for the Bishop of Laval, who was more prompt in deciding to go to Rome than his brother, and who was charged with holding false doctrines, being, indeed, a Freemason, he soon decided to resign his see. In his case also the telegraph gives us the result. The Bishop of Laval, who was accused of immoral conduct, resting upon the refusal of the Pope to accept his resignation, was summoned to the Vatican to be judged by the Pope.

The point upon which we are not informed is that involved in the problem: At Laval and Lyons, who appear to have avowed their faults, as charged, by their resignations, should the Pope be unwilling to be longer Bishops in France, yet should be regarded by the holy father, as worthy to be "in partibus."

The telegraph also omits to relate how it is that it was known in advance that the Bishop of Laval would resign. It is said that the Bishop of Laval, who was accused of immoral conduct, resting upon the refusal of the Pope to accept his resignation, was summoned to the Vatican to be judged by the Pope.

SEPARATION REALIZED.

In conclusion, and in fact, it is manifest that in this incident is realized at once the separation of church and state in two dioceses. At Laval and Lyons the Pope will appoint apostolic administrators, the government will refuse to recognize them, and in these dioceses the separation of church and state will be complete.

There must be added to the story of this religious conflict the relation of the interview with M. Chaumie, which has been published in the Matin. The editor of this journal went to see M. Chaumie at Hendaye, and from their conversation it appears that the Council of Ministers decided that M. Rouvier was opposed to the tax upon the revenue, that M. Chaumie himself was antagonistic to the separation of church and state and that M. Chaumie should not be abandoned, a proposal which Combes and his colleagues in favor of adding still greater gravity to the situation. M. Chaumie says, apparently, that the three ministers have each made a statement, President of the Republic.

This interview has been widely and eagerly discussed, and has aroused in the breast of M. Combes and on Thursday his colleagues the Minister of Public Instruction gave emphatic denial to the whole, stamping the report of the conversation as a fabrication. It is probable, however, that quite in the fashion as thus outlined, the comedy will end, and the great astonishment, indeed, if before the discussion of the separation can be reached the ministry is not dissolved and reconstituted entirely by M. Rouvier, with the ministerial majority of today in the new cabinet. Its life, however, will not be of great length, for the majority which will sustain it will be of extreme instability.

COCKLESHELL NAVIGATOR MAKES BUSINESS PAY.

SPECIAL BY CABLE TO THE ST. LOUIS REPUBLIC AND THE NEW YORK HERALD, London, Sept. 10.—(Copyright, 1904.)—Captain Voss of the three-master Tithium, two and a half tons, which anchored in Margate Harbor this week, is perhaps the only cockleshell navigator who has made money at the business.

His crew consists of an expert advance agent, who looks more at home in a top hat and a Prince Albert coat than in oil skins.

The Tithium has traveled 41,000 miles, starting from Vancouver, B. C., three years ago, and finishing her trip at the London Hippodrome next week. She is nothing but an Indian dug-out canoe, 41 feet long, 10 feet wide, and 10 feet deep. She has a curved bow like a Viking ship and her three masts look like small bean poles.

She spreads thirty-eight yards of canvas. The old sails of Margate shake their heads at the canvas. She is the fastest of the kind ever weathered a gale, but the skipper is armed with the profits. He attributes his success in riding out all kinds of blows to a canvas sea anchor of his own invention.

As a "mascoot" he carries the skull of the Indian who carved out the canoe. In the United States he has a crew and a compass, and sent them to the bottom together. With this exception, Captain Voss has no serious accidents.

DEFENDS TAXAMETERS USED TO MEASURE CAB TRIPS.

SPECIAL BY CABLE TO THE ST. LOUIS REPUBLIC AND THE NEW YORK HERALD, Paris, Sept. 10.—(Copyright, 1904.)—M. Bixis, president of the Compagnie Generale des Voitures, has written a letter to the Figaro explaining that it is not true that the taximeter now being tried in the cabs makes the fare more expensive, when

A DEAR OLD SOUL ACTIVE AND HAPPY AT 106

Mrs. Nancy Tighe, of Lafayette, Ind., Although in Her 106th Year, Says:

"I Really Don't Feel Like I'm a Day Over 60, Thanks to Duffy's Pure Malt Whiskey, Which Is the Real Secret of My Great Age, Health, Vigor and Content."

Mrs. Tighe Is Blessed with All Her Faculties and Does Exquisite Fancy Work Without Glasses. She Is as Spry as Many Women Half Her Age.

With the Help of the Invigorating and Life-Giving Powers of This Wonderful Medicine Mrs. Tighe Says She Expects to Live Twenty-five Years Longer.

MRS. NANCY TIGHE, 106 ON MARCH 15.

"I will be one hundred and six years old," writes Mrs. Tighe, "on the fifteenth of March, and really I don't feel like I am a day over sixty, thanks to Duffy's Pure Malt Whiskey. Friends say I look younger and stronger than I did thirty years ago. I have always enjoyed health and been able to eat and sleep well, though I have been a hard worker. Even now I wait on myself and am busy on a pretty piece of fancy work. My sight is so good I don't even use glasses. Am still blessed with all my faculties. The real secret of my great age, health, vigor and content is the fact that for many years I have taken regularly a little Duffy's Pure Malt Whiskey, and it has been my only medicine. It's wonderful how quickly it revives and keeps up one's strength and spirits. I am certain I'd have died long ago had it not been for my faithful old friend 'Duffy's' August 1, 1904.

Duffy's Pure Malt Whiskey

IS THE COMFORT AND SUPPORT OF OLD AGE.

The sincere and grateful tribute of Mrs. Tighe to the invigorating and life-prolonging powers of Duffy's Pure Malt Whiskey is one of the most remarkable and convincing of records. She saw, reads and is dependent upon no one for a little services and attentions of old age. Mrs. Tighe's memory is perfect, and her eyes sparkle with interest as she recalls events that have gone down into history of the past hundred years. Instead of pining, as many women half her age, she is firm in the belief that with the comforting and strengthening assistance of Duffy's Pure Malt Whiskey she will live another quarter of a century.

If you wish to keep young, active and vigorous, and have on your cheeks the roses of health, and retain full possession of your mental powers, you must take Duffy's Pure Malt Whiskey regularly as directed and avoid drugs of all kinds. It nourishes the vitality, no matter how weak or feeble it may have become; feeds and enriches the blood, and stimulates the circulation, giving health and power to body, brain, nerve and muscle.

The absolute purity of Duffy's Pure Malt Whiskey is attested by the fact that thousands of doctors and hospitals use it exclusively, and that it is the only whiskey recognized by the Government as a medicine. It contains no fuel oil.

CAUTION—When you ask for Duffy's Pure Malt Whiskey, be sure you get the genuine, and not a cheap imitation. Look for the trade-mark, the "Old Chemist" on the label, and be sure the seal over the cork is not broken. \$1.00 a bottle.

Medical booklet with testimonials and doctor's advice free. Duffy's Malt Whiskey Company, Rochester, N. Y.
